EDUCATION

Princess Sumaya University for Technology

BE in Networks and Information Security Engineering

EXPERIENCE

Accenture

Doha, Qatar

Security Consulting Consultant

May 2026 - Present

- Lead security architecture reviews and design workshops, providing technical guidance on cloud-native security controls, identity, network security, and compliance
- Drive AI adoption within security consulting engagements by leveraging AI-assisted tools to accelerate security assessments, policy analysis, threat investigations, and security documentation while maintaining governance and human oversight.
- Lead cross-functional engagements with cloud, infrastructure, networking, and application teams to embed security-by-design principles throughout cloud transformation initiatives.
- Mentor junior consultants and analysts, providing technical guidance, reviewing deliverables, and supporting capability development across the team.

Security Consulting Analyst

Apr 2025 – May 2026

- Served as a Cloud Security Consultant on a large-scale government hyperscaler engagement, advising on a multi-cloud security architecture, threat management, and governance
- Designed and implemented a tiered IAM model using Azure RBAC and PIM, enforcing least-privilege access and strict segregation between production and non-production environments
- Led WAF and SASE security architecture and operations, securing cloud applications and managing CDN and access security controls
- Defined and executed a SIEM log retention and optimization strategy, reducing ingestion costs by \$30K per month while preserving security and compliance requirements
- Managed CSPM and compliance initiatives, improving the cloud security posture score from 50% to 90%

Wizard Cyber

Amman, Jordan

SIEM Engineer and Incident Responder

June 2024 - Apr 2025

- Led end-to-end security onboarding projects, successfully deploying and configuring Microsoft Sentinel and Defender environments from initial setup to full operational capability, ensuring seamless integration with existing IT infrastructure
- Led incident response efforts, ensuring swift containment, remediation and thorough post-incident analysis and reporting
- Served as the primary point of contact for multiple clients, managing their requests, providing expert guidance on SIEM and SOAR engineering
- Drove sales initiatives by preparing customized proposals, leading technical demos, and executing POCs, ensuring alignment with client requirements and consistently meeting success criteria to secure project buy-ins

Security Engineer

Feb 2023 - June 2024

- Developed and implemented security playbooks and automation rules by utilizing cloud-native orchestration tools to enhance operational efficiency
- Showcased adept problem-solving skills by efficiently resolving L1 and L2 Tickets for a diverse clientele of 30+ clients, applying deep technical expertise to maintain organizational security
- Developed and fine-tuned detection rules to optimize threat detection and reduce false positive alerts
- Spearheaded the Training Academy as Coordinator and attained an exceptional 100% success rate in guiding and mentoring 8 trainees to successfully pass their SC-200 certifications, enabling them to become L1 SOC Analysts
- Managed and optimized cloud security services, encompassing identity and access management (IAM), comprehensive logging and detection systems
- Assisted in vulnerability management processes uncovering, prioritizing, and tracking the remediation of security risks
- Performed risk assessments and gap analysis to uncover potential vulnerabilities and recommend mitigation strategies

Black Mountain

Amman, Jordan

Cybersecurity Consultant

Aug 2022 - Oct 2022

- Mapped ISO 27001 ISMS to medical laboratory standards, drafted cybersecurity proposals and reports, additionally performed web/network penetration tests

Alpha-Hub ICT Solutions

Amman, Jordan

Cybersecurity Engineer

Apr 2022 - Aug 2022

- Elevated team's technical proficiency through practical demos, including QRadar, Splunk, and ThreatQ, and acquired a comprehensive understanding of ethical hacking, incident response, adversary emulation (INE, Caldera) and the XDR-like infrastructure through hands-on experience and training

Ericsson

Amman, Jordan

Network Engineering Student Intern

May 2018 – June 2018

- Shadowed different engineers and project managers and attended basic training by Ericsson network engineers as part of a high school requirement
